AN INTERACTIVE ONE-DAY COURSE

This interactive one-day course is packed with strategies and tools that you can use to increase your effectiveness in the boardroom at a practical level.

You will apply the theories and frameworks from your own experience or the Mandatory Director Training, to your own club.

For governance, this includes activities like, analysing the effectiveness of your board composition against strategic objectives, assessing your board's compliance/governance obligations and tips on how to be an effective influencer at board meetings.

For the finance component, you will revisit how to interpret financial statements and key performance indicators and then we will apply those same principals to your own club's financial statements from your annual report.

This is your chance to interpret and assess your club's financial position and ensure you are meeting your director/management financial reporting obligations.

"Most enlightening and professional, training in a no-nonsense manner."
Vice President, The Coast Golf Club

"Debbie was incredible in her presenting style, and examples."
Director, The Demo Club
